Fidelity Asset Allocation Private Pool

- The Pool will generally have an asset mix with the following ranges: 25–65% equity securities, 25–65% fixed-income securities and 0–40% money market securities.
- Within these ranges the portfolio manager uses tactical allocations focused on downside risk mitigation with asymmetric bands. This means that based on the neutral equity mix of 50%, the portfolio manager may overweight equities by up to 15% and underweight by up to 25%, and based on the neutral fixed income mix of 40%, the portfolio manager may overweight fixed income by up to 25% and underweight up to 15%.
- The portfolio manager may change, or re-allocate the Pool's investments at any time.

Pool management

- Portfolio managers are David Wolf and David Tulk.
- In making tactical asset allocation decisions, the portfolio manager uses extensive economic and bottom-up fundamental market inputs and extensive global macro research.

- 1 Management fees do not include administration and other operating expenses and applicable sales tax. Fees are shown in basis points. Note that fee reductions are applicable only on that portion of assets that fall within the specified tier.
- 2 The Pool is closed to new purchases and switches for registered plans, except for existing systematic transactions. You may not purchase securities of this Pool within a registered plan. You may purchase securities of Fidelity Asset Allocation Private Pool Trust instead.
- 3 The blended index is 30% S&P/TSX Capped Composite Index, 24% FTSE Canada Universe Bond Index, 20% MSCI AC World Index ex-Canada (Net), 16% Bloomberg Global Aggregate Bond Index and 10% FTSE Canada 91-Day T-Bill Index. Prior to October 1, 2014 the Pool's benchmark was a blend of 50% S&P/TSX Capped Composite Index, 40% FTSE Canada Universe Bond Index and 10% FTSE Canada 91-Day T-Bill Index.
- 4 A fund's volatility is determined using a statistical measure called "standard deviation. Standard deviation is a statistical measure of how much a return varies over an extended period of time. The more variable the returns, the larger the standard deviation. Investors may examine historical standard deviation in conjunction with historical returns to decide whether an investment's volatility would have been acceptable given the returns it would have produced. A higher standard deviation indicates a wider dispersion of past returns and thus greater historical volatility. Standard deviation does not indicate how an investment actually performed, but it does indicate the volatility of its returns over time. Standard deviation is annualized. The returns used for this calculation are not load-adjusted. Standard deviation does not predict the future volatility of a fund. The investment risk level indicated is required to be determined in accordance with the Canadian Securities Administrators standardized risk classification methodology, which is based on the historical volatility of a fund, as measured by the ten-year annualized standard deviation of the returns of the fund. Standard deviation is used to quantify the historical dispersion of returns around the average returns over a recent ten-year period.

Source: Fidelity Investments Canada ULC. Performance shows annual compounded returns as at June 30, 2024 (Series F) net-of-fees, in Canadian dollars.

Read a fund's prospectus before investing. Mutual funds are not guaranteed; their values change frequently and past performance may not be repeated. Investors will pay management fees and expenses, may pay commissions or trailing commissions and may experience a gain or loss. The indicated rates of return are the historical annual compounded total returns including changes in unit value and the reinvestment of all distributions and do not take into account sales, redemption, distribution, optional charges or income taxes payable by any security holder that would have reduced returns. If you buy other series of Fidelity funds, the performance will vary largely due to different fees and expenses. Investors who buy Series F pay investment management fees and expenses to Fidelity. Investors will also pay their dealer a fee for financial advice services in addition to the Series F fees charged by Fidelity. © 2024 Fidelity Investments Canada ULC. All rights reserved.
