

A sustainable investment approach designed to capture the opportunities created by the global transition to a low-carbon economy.

Why now?

Environmental policy is gathering pace around the world, from the E.U.'s Green Deal and the U.S. rejoining the Paris Agreement to China and many other countries announcing net-zero emissions targets. For decades to come, governments and companies around the world will need to commit trillions of dollars towards decarbonization.

This is where we believe the opportunity lies.

\$6.9 trillion U.S. dollars per year	\$26 trillion U.S. dollars	130 countries
Required investment in clean energy infrastructure annually to meet the Paris Agreement decarbonization goals.	Estimate of the direct economic gain that could be created by climate action through to 2030.	Countries that have made or are considering net-zero commitments and will have to make significant investments in decarbonization.
Companies well positioned to manage climate risks and opportunities may be rewarded by the market with more capital and higher valuations.		

Source: OECD, Global Commission on the Economy and the Climate. Energy and Climate Intelligence Unit. Vivid Economics. "Decarbonization" refers to the reduction of carbon dioxide emissions through a transition to a low-carbon economy.

Why invest in these Funds?

At Fidelity, we believe strong research drives long-term performance. We believe we have the competitive edge and intelligent insights needed to capture the opportunities created by the global transition to a low-carbon economy.

Positioned to benefit from the decarbonization trend that may drive global growth for decades.

A potential to influence change through lower carbon emissions and long-term value creation

Leverages Fidelity's trusted approach, including its vast global research network and proprietary ESG research.

Fidelity Climate Leadership™ Funds leverage Fidelity's investment platform and deep global fundamental research network, and are supported by insights from a dedicated Sustainable Investing team and robust proprietary ESG research.

Meet the portfolio managers

Meet the portfolio managers who will help you navigate the risks and opportunities created by the global transition to a low-carbon economy. They are all experts in their asset class, with decades of industry experience.
